**Well Attended Board
of Trade Meeting**

The first meeting of the fall and winter luncheons of the Crossfield and District Board of Trade was held in the Oliver Cafe on Monday evening; about thirty-five being present.

Messrs W. H. Ross, A. C. Fraser and John Hanna, of the Calgary Board of Trade were the guests of the evening in the absence of Messrs Collicutt and Wright who expressed their regrets at not being able to attend.

During the course of short addresses given by the visitors, a great deal of ready wit and repartee was much in evidence. The "Scotch" and "Irish" too, literally speaking, of course, were mixed quite freely, and a very pleasant evening was enjoyed by all present.

President Laut gave a short resume of the work accomplished by the Board during the past year and pointed out that while the record is one of which all can be proud, we aspire to bigger and better things in the future.

The nuisance ground and Telephone Exchange came under fire, and we have no doubt but that in time these "eye sores" will have disappeared.

After a few words from several of our local members on various subjects, a most successful meeting was brought to a close.

**BOARD OF TRADE OUT FOR
NEW TELEPHONE BUILDING**

The Board of Trade is again bringing to the attention of the Alberta Government Telephone at Edmonton, the need for a new Telephone Exchange at Crossfield.

As we all know the present telephone building has not even the appearance of a place of business, and was in the first place two dwellings converted into one. The rooms upstairs have never been finished and can not be used; the floors down-stairs are worn out; there are no modern conveniences in the building; and has the appearance of being a very cold and expensive place in which to live during the winter.

Now is an opportune time for the Government to do away with this old wreck and give us a neat attractive building; similar to their building at Carstairs, would fill the bill to a nicety.

Business done at the local exchange has increased greatly in the past ten years, and will continue to increase.

It is high time that the Government seen to it that we had a building that is at least in keeping with the amount of business done at this point.

The Municipal District of Rosebud seen to it that they had an office building that was well built, attractive and a credit to the town and district. It is up to the Government, and make no mistake about it, it is practically impossible to get anything done by the Provincial or Dominion Governments of Canada, unless you keep hammering away at them, and that is just what the Board of Trade is going to do. We want action and are going to stay with it like a pup to a root.

The Board of Trade drew first blood from the Telephone Dept. some months ago, and were informed that Crossfield was well up on the list for a new building. Fine. But when, is the burning question.

Mr. and Mrs. R. M. McCool are expected home from Edmonton this week. Milt was taken down with the flu shortly after his arrival in Edmonton over a week ago.

**Christmas Tree and
Concert, Dec. 22nd.**

Christmas time is coming around again, folks, and with it comes the annual Christmas Tree and Concert put on by the United Sunday School, The Anglican Sunday School and the Public School. The date is Monday, December 22nd; the time is 8 p. m. sharp. To defray the expense it has been found necessary to set an admission price of fifty cents for all persons over eighteen years of age. However, Mr Hay assures us that the program will be well worth this very nominal charge—"bigger and better than ever," he says.

This year will be the "White Gift" year insofar as our concert is concerned. Full details of this plan and of other plans will be published in the next issue of the Chronicle.

Bazaar a Huge Success

The bazaar put on by the Women's Guild on Saturday last was a great success. At three o'clock it was declared open by The Rev. Currie, business then proceeded briskly until six o'clock. The splendid sum of \$196.15 was realized, including the table cloth and doll which were drawn for at the end of the afternoon; the cloth going to Mr. Sefton and the doll to Jimmie Harrison.

The ladies of the Guild take this opportunity to extend their thanks and appreciation to the orchestra under the direction of Mr. Olsen, for providing several good musical selections during the afternoon, also all those who donated in any way to the bazaar and all who helped to make the affair such a splendid success.

A Special Event

Hillhurst Toc H. Concert Party will appear in the U.F.A. hall on Friday, Nov. 28th. at 8.30 p.m. in Solos, Duets, Quartettes by such well known artists as Edgar Phys, Mrs. T. Vickers, D. J. Vickers, D. J. Davies, etc.

Proceeds on behalf of the Anglican Church of Crossfield.
-Tickets 50c. Children under 12 half price.

At Royal Winter Fair

Mr. and Mrs. Frank Collicutt left on Sunday for Toronto where they will attend the Royal Winter Fair. Mr. Collicutt has several head of his famous Hereford cattle entered in this show which is recognized as Canada's premier stock show.

**Improving Waiting Room
at the Curling Rink**

Ed. Meyers is doing a good stroke of voluntary work at the rink this week. Ed. is papering the waiting room, which will not only add to the appearance of the place, but will make it a whole lot warmer.

Madden News

The Alberta Pacific Grain Co. opened their new elevator at Madden on Wednesday.

Seven carloads of material came in this week over the C. P. R. for the National Elevator Co. who have commenced excavating for their elevator at this point.

The Imperial Lumber of Edmonton are opening a branch yard here and at present have a load or so of lumber on the ground and an imposing sign.

Ballasting is now being done between Crossing and Madden, while the track-laying gang are waiting for the bridge to be completed at Dog Pound.

MEAGRE RESULTS OBTAINED FROM IMPERIAL PARLEY

London, Eng.—Right Hon. Philip Snowden's victory over the Imperial Conference is now clear. He may give way to the extent of allowing a stabilization period of three years for the present preferences because he needs the revenue, but that is the best the Dominions can hope for.

It is admitted that nearly every vital point of his economic policy will be shelved until a further conference, presumably the Imperial Economic Conference to be held in Ottawa.

This, apparently is acceptable to Premier R. B. Bennett, because he knows the political feeling of the British people, which anticipates that the Conservatives will be back in power by then and will be able to do something towards reciprocal tariffs.

The Dominions are disappointed at the meagre results of the conference and are turning to one another for the creation of a series of treaties between themselves, based on the principle of reciprocal tariffs.

These negotiations are shrouded in mystery because of their delicacy, but one of the Dominion premiers remarked to the British United Press that there was only one thing to be really grateful for, and that was that the conference provided an opportunity for the heads of the various Dominions to get together and lay down the basis of future commercial treaties between themselves.

On the constitutional side, the Dominions are very pleased. The appointment of native born governors-general by direct advice from the Dominion premiers and without the advice of the minister of the mother country, is conceded, but the King will decide the "suitability" of the man named.

However, this condition is so elastic that it is easy to foresee that if the King decides that the previous political affiliations of one of those recommended makes him not suitable, another name must be submitted.

Will Carry Out Mandate

Premier Ramsay MacDonald Refers To Government's Position In Regard To Palestine

London, England.—Premier Ramsay MacDonald assured the House of Commons that parliament would have a full opportunity to discuss the White Paper on Palestine before any ordinances were framed on its basis.

In response to questions, he reiterated governmental assertions that the recent White Paper, regarding the British attitude towards Jews and Arabs in Palestine, had been misinterpreted and said the government intends to carry out its obligations under the mandate to both sections of the Palestine population.

Pensions Board

Western Pensions Tribunal To Hold Sittings In The West

Winnipeg, Man.—Members of the Western Pensions Tribunal, appointed under the revised Pension Act to adjudicate on western applications for pensions, commenced their sitting in Winnipeg recently. Majority of cases to be dealt with are those previously turned down by the former pension board.

Dates of western sittings are: Regina, November 24-28; Calgary, December 1-5; Vancouver, December 8-20.

Has First Plane Crash

Charlottetown, P.E.I.—Prince Edward Island's first aeroplane crash occurred at Lot 16 when a "plane owned and piloted by H. S. Jones, of Apohaqui, New Brunswick, fell from a height of about 25 feet. The plane, with Charles Yeo, of Lot 16, as a passenger, and Jones at the controls, made a good take-off, but the engine stalled and went dead shortly after the machine left the ground.

Plan World Exhibition

Sydney, Australia.—When the Sydney Harbor Bridge is opened here a "World Exhibition" will be held commemorating the event. It is expected that the exhibition will be held some time in January. It will include displays of agricultural, industrial, mining and artistic materials.

Plan Was Rejected

London, England.—The British Government definitely rejected the Canadian offer of reduced Empire tariff preferences put forward by Premier R. B. Bennett at the opening of the Imperial Conference.

W. N. U. 1864

Air Lines Across Canada

Company Being Formed To Operate Coast To Coast Service

Toronto, Ont.—Formation of a transportation company, to be known as Canadian Airways Limited, is well under way.

The plan has been endorsed by the government, thus enabling the C.N.R. to participate with the C.P.R., Western Canada Airways Limited, and the Aviation Corporation of Canada, in the formation of a large company of air transportation.

Headquarters are being established in Montreal, with James A. Richardson as president and Sir Henry Thornton, head of the C.N.R., and E. W. Beatty, head of the C.P.R., as joint vice-presidents. There will be 13 directors, representative of leading financial and commercial interests in Canada.

Mr. Richardson, who is director of several aviation and financial organizations, and also sole owner of Western Canada Airways, will be the largest shareholder. Canadian Airways will subscribe \$250,000 of the capital involved, which amounts to a total of \$200,000 shares of no par value. Their contribution at the present time is small.

The new organization will operate in two sections, known as Eastern Canada lines and Western Canada lines, each providing a highly organized passenger, mail and express transport service by air.

Within a very short time, it is understood, passengers, mails and express will be carried from coast to coast within Canada.

Great Future For Vancouver

Minister Says Coast City Will Become Greatest Port In The World

Vancouver, B.C.—Vancouver's political allegiance is Vancouver's own business, and, regardless of it, the duty of the Minister of Marine is the development of transport facilities of this port, which promise to become the "greatest in the world."

Such was the statement of the Minister of Marine, Hon. Alfred Durnan, in the course of an address before the Vancouver Canadian Club recently.

"The port of Vancouver, I believe, is destined to become the greatest in the world," said the minister. "It requires no great imagination to visualize that within the next quarter of a century it will be the centre of a huge trade with the Orient. Vancouver is the gate of British North America for a commerce such as was never dreamed of by the merchants of ancient Asia."

Least he be criticized for making "the oration of a lawyer," the speaker reminded his hearers that some of the country's leading capitalists are lawyers.

"What this country needs is men of action in business as well as politics," he said. "They alone can put a stop to the trade depression which this country, in fact, all countries have suffered during the last couple of years. They alone can bring us back to the practical thoughts, to the sound methods which lie at the very foundation of Canada."

"Marigold" To Visit Regina

Delightful Play Which Has Drawn In Montreal and Toronto, Appears For Three Days

Regina, Sask.—Some shows that reach Regina with an all-star cast direct from London, England, may be stretching the point, but "Marigold," which will play at the Capitol Theatre for three days commencing Monday, November 24th, can truthfully claim to be a London company.

"Marigold" is a delightful play by L. Allen Barker and F. R. Pryor, of the Queen Victoria period. The Queen's visit to the Scottish capital, Edinburgh, starts a romance that is the basis of the play. It will be a welcomed addition to the theatrical season of Regina, and should obtain excellent support because real live actors will tread the boards of the stage and give flesh and blood performances.

The splendid cast will include Sophie Stewart, Ellis Irving, Lionel Gadden, Edmund Eversford, Royalty Taylor, Marguerite Collier, Winifred Orr, Yvette Pienne, Walter Roy, Gordon Pettie, William C. Aldous, John Leiston, Marie Shields and Jean Clyde, daughter of the famous Scottish star, John Clyde. Yvette Pienne is the only member of the cast who was not with the London company when the play was produced there. She stepped into a French part when the original girl could not cross the Atlantic owing to illness. "Marigold," which has had wonderful receptions in Montreal and Toronto, should delight Regina when it opens at the Capitol Theatre for a three day run.

White Foxes Driven South

The Paz, Man.—White foxes, the most prized quarry of northern trappers, have been seen 90 miles from this northern Manitoba centre. Scarcity of caribou in the Peace Lands is believed to have driven them south in search of food.

Sees End Of Bolshevism

Predicts That Soviet Russia Will Turn To Capitalism Within a Year

New York.—Sir Percival Dewhurst Perry, chairman of the Ford Motor company of Europe, predicted, on his arrival on the S.S. Bremen, that Russia will become a capitalistic state within a year.

"There is no question but that Soviet Russia will recognize capitalism within a year," Sir Percival said. "They have seen the writing on the wall, and with the anticipated collapse of their five-year plan, there is no doubt at all that they will revert to capitalism to avert a revolution."

Accompanying Sir Percival were Maurice Dolfus and Dr. Karl Wilhelm Hauss. The group will confer with Henry Ford at Detroit.

To Eliminate Radio Trouble

Street Cars In Moose Jaw Are Equipped With Condensers

Moose Jaw, Sask.—Street cars in Moose Jaw have been equipped with condensers having a view to eliminating much of the radio interference in the city, according to an announcement made recently by J. Leibrick, secretary of the Moose Jaw Radio Association. The condensers have been installed as a result of negotiations between radio dealers in the city and the street railway company. They are installed on the generators in the street cars.

ROYAL ADDRESS AT OPENING OF INDIAN PARLEY

London, England.—The future of India's millions was cast into the caldron of the momentous round table conference which the King, in a hopeful speech, opened at the gallery of the House of Lords on November 12.

A scene splashed with Oriental splendor such as rarely has been seen before in the western world was the setting for the ceremonial inauguration of the important negotiations, the gravity of which was stressed in the royal address and those which followed, by Premier MacDonald, the Indian princes and the delegates from India.

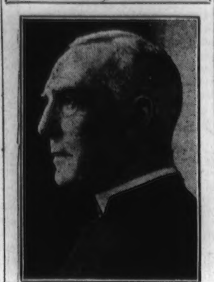

East met west round two large oval tables, one set within the great red and gold hall, scene of the opening of the five-power naval conference last winter.

A few minutes before noon the King entered the hushed hall. Centred in the colorful gathering was the golden chair of state, which he addressed the assembly. In conventional morning clothes, the King made an impression by the fervor of his address.

From his red spectacle case he took rimless glasses, looked them behind his ears, and slowly and carefully read his speech.

"No words of mine are needed to bring home to you the momentous character of the task to which you have set your hands," he said in an appeal for solution of the great problem of the future system of government for India. "Each one of you will, with me, be profoundly conscious how much depends to the whole of the British Commonwealth of the issue of your consultations. This community of interest leads me to come forth and it is a happy

ON TOUR IN WEST

Rev. James A. Findlay, delegate from Church of Scotland, who is now touring United churches in the west.

arguing that there should be present today the representatives of my government in all the sister states of this commonwealth.

"I shall follow the course of your proceedings with the closest and most sympathetic interest, not indeed without anxiety, but with a great confidence. The material conditions which surround the lives of my subjects in India affect me greatly and will be ever present in my thoughts during your forthcoming deliberations."

"I have also in mind the just claims of majorities and minorities of men and women, of town dwellers and tillers of the soil, land owners and tenants, of the strong and the weak, of the rich and the poor, of the races, castes and creeds of which the body politic is composed."

"For these things I care deeply. I cannot doubt that the foundation of self-government is in the fusion of such divergent claims into mutual obligations and in their recognition and fulfilment. It is my hope that the future of the government of India, based on this foundation, will give expression to her honorable aspirations."

"May your discussion point the way to a sure achievement of this end, and may your names go down in history as men who served India well and whose endeavours advanced the happiness and prosperity of all of my beloved people. I pray that Providence may grant you in bounteous measure wisdom, patience and goodwill."

His Majesty spoke but a few minutes. He shook hands with Premier MacDonald, bowed left and right to the delegates, and left the hall escorted by the Lord Chamberlain. The Indian conference was inaugurated.

Four furniture movers took the throne away and replaced it with a chairman's seat while the Maharajah of Patiala, with his double pearl earrings bobbing against his black beard, proposed that Premier MacDonald take the chair. Agha Khan, head of the Indian Muslims and Great Britain's leading race horse owner, seconded the motion and Mr. MacDonald stepped forward. He spoke, not extemporaneously as usual, but with studied care, reading from a precisely worded address.

"We are met," he said, "to try to register by agreement a recognition of the fact that India has reached a distinctive point in her constitutional evolution. Whatever that agreement may be, some will say that it is not good enough or that it goes too far. Let them say so. We must boldly appeal to an intelligent and informed public opinion."

TROPHY PRESENTATION

George M. Inverarity and J. K. Christian, of Carberry, Manitoba, winners of the Canadian Pacific Manitoba Boys' and Girls' swim club competition. The lucky lady, in addition to the trophy shown being presented to them by C. B. Stockill, assistant to the vice-president of the Canadian Pacific, won a medal apiece and qualify for a free trip to the Royal Winter Fair at Toronto.

Predicts Another War

General Ludendorff Sees the Annihilation Of Germany In 1932

Berlin, Germany.—Another great European war in 1932, resulting in the annihilation of Germany, is predicted by General Erich Ludendorff in a pamphlet published recently.

In the 32-page pamphlet, the one-time World War military giant expresses the belief that the war, beginning May 1, 1932, will find Germany, Austria, Hungary, Great Britain and Soviet Russia opposed to France, Poland, Czechoslovakia, and Rumania.

He visualizes Germany as the battleground of the nations, with her cities razed by air attacks, her civilian population left to their fate and the nation's youth perishing in masses on the battlefields.

Altho he believes the war will last but a few weeks, he imagines Berlin held in a vise-like grip by the enemy forces, who mercilessly drive the fugitives back into the city's confines to die of starvation.

He sees German culture as receiving its death blow and the terrors of the 30-years' war surpassed.

Vorwaerts, in commenting on the pamphlet, recalls that Adolf Hitler, at the time of his abortive speech in November, 1923, selected Ludendorff as his minister of war, with the object of organizing a "war of revenge."

Attempted Assassination

President Cosgrave Of Irish Free State Has Narrow Escape

Dublin, Ireland.—An apparent attempt against the life of William T. Cosgrave, president of the Irish Free State, was made on Monday night, November 10, it was learned here.

The would-be assassins, who had prepared an ambush on the highway leading to Cosgrave's home, opened fire on the motor car carrying the president, and an accompanying car. Bullets struck both machines but none of the occupants were injured.

President Cosgrave was returning to his home in the Fort Dublin mountains at the time of the shooting and was without his usual armed escort. Neither driver was armed and hence no immediate search was made for the gunmen, who fired from behind bushes. One bullet was said to have entered the car very close to where the president was sitting.

Government officials were reported "most disturbed" by the occurrence.

LARGE SUMS FOR PUBLIC WORKS IN THE WEST

Ottawa, Ont.—Details of public works to be undertaken by way of unemployment relief in Western Canada, totalling \$1,455,041, were announced by Hon. G. D. Robertson, Minister of Labor.

The sum of \$52,400 is provided for improvements to the Prince Albert National Park in Saskatchewan. In addition, \$1,403,641 provided for road improvements and sewers in municipalities, distributed as follows: City of Swift Current, \$29,341; village of Kincaid, \$1,500; village of Shellbrook, \$2,000; village of Shaunavon, \$1,500; village of Shamrock, \$500; village of Pennant, \$1,000; village of Coderre, \$1,000.

Works authorized in Manitoba total \$235,000, and include the expenditure of \$20,000 in improvements to the Riding Mountain National Park. The remainder consists of road improvements in municipalities as follows: Ritchie, \$1,250; Tache, \$1,250; North Kildonan, \$66,000; St. Vital, \$25,000; East Kildonan, \$114,265; St. Paul, \$1,250; Brooklands, \$4,250.

The expenditure of money on these works has been approved by the Dominion Government and contributions to the undertakings will be made out of the \$20,000,000 unemployment relief fund established by parliament at the recent special session.

The list of works for British Columbia were more extensive than the others because a considerable part of the expenditures in Manitoba and Saskatchewan was announced a week ago and the program of works proposed in the province of Alberta has not yet been completed.

In British Columbia there are still municipal public works amounting to \$188,932 and provincial undertakings amounting to \$4,000, particulars of which have not been received by the Dominion Government. The expenditures will cover a wide range of works, including road improvements, sewer construction, improvements to national parks, construction of parks, waterworks, airports, sidewalks, school grounds and bridges.

TO BOOST TRADE BETWEEN CANADA AND THE ORIENT

Kobe, Japan.—Five committees from the delegates of the Canadian Chambers of Commerce (the missions are headed by John M. Imrie, Edmonton, exchanged felicitations, and hoped for a continuance of the expansion of trade between the countries. The feature address was given by J. C. Cameron, Victoria. The speaker, after the usual greetings, addressed a luncheon at Kobe on Canada's development, history, political and economic.

Following the luncheon the delegates were the guests at a reception given by the Canadian Academy, President Bates and Principal Trench described the beginning and growth teaching 200 pupils, most of them of the institution, which was now children of Canadian missionaries. Mr. Imrie expressed the thanks of the delegates for the reception, and remarked that Canada was obviously exporting her hearts and minds and ideals.

The governor of Kanagi prefecture, the mayor of Kobe, and the local chamber of commerce were hosts to the delegates at a banquet, at which Mayor H. Hamilton, Vancouver, gave an address.

Penitentiary Crowded

Saskatchewan Institution At Prince Albert Crammed To The Doors

Prince Albert, Sask.—The Saskatchewan penitentiary here is crammed to the doors with 538 prisoners, the greatest number in the history of the institution, and those in charge are beginning to worry about how to get rid of the turnover.

Prisoners in Saskatchewan and Alberta continue to be as heavy. Temporary accommodation has been provided for 100 of the men for whom there are no permanent cells. A new wing, designed to accommodate 200 men, is in the course of construction but will not be ready for at least two years, so little hope of relief is expected from this source.

Canada's Rights Recognized

Title To Northern Islands Formally Announced By Norway

Ottawa, Ont.—The government of Norway has formally recognized the Canadian title to the Arctic Islands commonly known as the Sverdrup Group, comprising Axel Heiberg, Ellef Ringnes, Amund Ringnes and King Christian. This friendly action on the part of the Norwegian government removes the one possible ground of dispute as to Canadian sovereignty in the whole Arctic section north of the Canadian mainland.

An announcement that Norway has given formal recognition to the Canadian title of these northern islands was made by Sir George Perley, acting prime minister.

Canadian Delegates Welcomed

Kyoto, Japan.—The City of Kyoto welcomed the delegates of the trade mission of the Canadian Chambers of Commerce here. The government, mayor and president of the Chamber of Commerce tendered the delegates a luncheon. The Mayor of Kyoto expressed his pleasure at the opportunity of meeting the Canadian representatives.

Bad Season For Fishing

Halifax, N.S.—Further word of poor conditions on the Canadian Labrador were received here with arrival of the trading schooner H. H. McIntosh, Captain Edgar McCarthy said that while the fishing season on the Newfoundland Labrador had been a success in the Canadian territory had experienced one of the worst seasons in its history.

Needed Longer Trip

London, England.—Squadron Leader R. S. Booth, commander of the dirigible R-100, said that if the Imperial Conference had not been in session, officers of the dirigible R-101 would have insisted upon additional flight trials before that ship left on the voyage which ended in the crash near Beauvais, France.

Air Mail Service

One Hundred and Seventy-Two of Mail Carried by "Planes East and West"

For the three months ending September 30, the aircraft engaged upon the 12 air mail services which now operate in Canada carried 119,501 pounds of mail, bringing the total from the beginning of the current year up to 379,426 pounds, or roughly 170 tons. One half of the services operate out of Montreal.

Two new services are projected, according to the quarterly report of the civil aviation branch of the Department of National Defence. One will run from Amos to Siceo in Quebec, 42 miles, and the second from the Peace River to North Vermilion in the North West Territories. The latter calls for 16 return trips during the winter and will be continued for four years.

The report shows that there are 500 aircraft flying in Canada, while the number of pilots is 717, of whom 485 are commercial pilots. The Dominion has 72 air harbours.

Exceeding: Eastern companies in mileage, were the "planes of Western Canada Airways Ltd., Winnipeg, Man. These flew 418,019 miles, carrying 5,564 passengers, 318,993 pounds of baggage and express and 76,572 pounds of mail. The percentage of regularity on schedule times was rated at 97.4.

The report says that 14 intermediate airmails are being leased, fenced in and graded with runways between Moose Jaw, Saskatchewan; Saskatoon, Saskatchewan, and Lethbridge-Edmonton, Alberta, a distance of approximately 500 miles. An airway beacon is being installed on one corner of each airmail, while five radio beacons are being installed at present at Forest, Man., Regina, Sask., Maple Creek, Sask., Lethbridge and Red Deer, Alberta.

There are 21 light aeroplane clubs in the Dominion. For the nine months ending September 30, 1930, 2,887 members of 30, members of these organizations had flown 11,567 hours. The membership totalled 2,887. Ontario has the largest number of flying clubs, with nine. Saskatchewan has three, Manitoba and Alberta, two each, British Columbia, one.

A Boon To Motorists

New Non-Skid Road in Chelsea, England; Frustrated Success

A road surface which it is claimed, eliminates all danger of skidding, is now being manufactured from Beton asphalt, refined in the shed of this name in the Dutch East Indies, and a recent demonstration in the borough of Chelsea, England, was regarded by the borough engineer and others as a success. After the road which had been treated with the material was watered, a number of motor cars were driven along it at high speed and brakes were applied violently, but there were no traces of skids, and when the driver tried to liberally to make the cars skid they could not do so. The non-skid qualities are believed to be due to a natural and uniform mixture of bitumen and shales.

An Interesting Building

Jerusalem Chamber Near Westminster Abbey, London, England.

His Historical Associations. At the foot of the Westminster Abbey, is a low, grey stone building known, after certain tapestries which used to hang on its walls, as the Jerusalem Chamber. It was built by Abbot Liffington in 1375, and in it the abbots of Westminster entertained their guests. Here died Henry the Fourth, and here Henry the Fifth became King. Here the Committee for the revision of the Bible worked for four years. Here Addison and Sir Isaac Newton lay in state. This beautiful chamber is cedar-paneled, and contains fine ancient glass and a contemporary portrait of Richard the Second.

"Late again. Have you ever done anything on time?"
"Yes, I bought a car."

He: "Remember, darling, that the doctor has forbidden you to bathe."
She: "Yes, but he hasn't forbidden me to wear a bathing costume."
—An Rolloff Half-Times, Goshenburg.

W. N. U. 1884

What Machinery Does

Displaces Labour But Makes More Number Of New Industries

An English newspaper which makes a feature of publishing extracts from its files of one hundred years back included one recently which stated that "an assemblage of about 400 agricultural workers at Hardness, Kent, proceeded in a body to destroy the threshing-machines in the neighborhood."

England was then much more of an agricultural nation than it is now. The lower classes were largely a peasant people to whom farming represented a ready source of employment, and it is quite natural that they should regard with dismay the introduction of machinery that tended to supplant manual labor.

The same thing happened, fifty years earlier when Richard Arkwright invented machinery to do the work of cotton spinners. Mobs destroyed his machinery, and burned down his mill at Chorley, Lancashire. But machinery has been of untold benefit to farms, and it made cotton the biggest single industry in England.

Men could scarcely be blamed for their attitude toward machinery in those days. They could not foresee the revolution it would bring about, nor the markets it would create by cheapening and increasing production at the same time. Had the example of those workers been generally followed and a ban put upon the introduction of machinery in all forms of industry, human progress and prosperity would have been held back to a degree that is inconceivable.

Machinery displaces a lot of labour in some respects, but at the same time it makes a vast number of new industries, including that of making machinery itself. Taking the widest view of the circumstances it is doubtful if machinery has ever displaced a single workman.

At the beginning of this century, there was an infinitesimal number of automobiles. Had a powerful farm bill in every Parliament in the world pushed through legislation to ban the "horrible carriage," (as it was originally called), on the ground that it would injure the horse-breeding industry, what would have been the state of world unemployment today?

Ten years ago there was no commercial radio. Today hundreds of thousands of people are engaged, directly and indirectly, in the vast service of broadcasting. Were radio sets not turned out by the million every year, those people would swell the ranks of unemployed.

And who can predict what new industry will be employing hundreds of thousands of men and women ten years hence?—St. Thomas Times-Journal.

The Woman Farmer

Increasing Number Taking Up Agriculture in England

The Over-Seas Daily Mail (London), says: Quite one of the most pleasant spots in which to ramble in this England of ours today is the neighborhood of a training farm for girls, or one of those farms which are mainly in the hands of those efficient young women who are happily more numerous than used to be the case. Here you seem to have been transported into a youthful world of abounding health and vigor.

I am told that more women than ever are taking up agricultural work, many of them the kind of seeking homes in one of the Dominion ultimately, others as gardeners or poultry women at home, and others to use the latest farming knowledge on parental farms. Established farmers seem keen enough now to give their daughters really practical education of the latest and best kind at the best available schools, so that they can be of use not merely for the dairy work but in all branches of the industry.

Large Amount Of Mail Carried

According to the Postmaster-General's annual blue book, 8,274 pounds of mail were carried on the Winnipeg-Calgary and Regina-Moose Jaw-Edmonton air mail routes during the department's fiscal year ending March 31, 1930. In all 180 single trips were scheduled and 173 actually carried out with a total of 52,653 miles flown. On all Canadian routes during the 12-month period, some 25 in all, a total of 425,280 pounds of mail were carried and 688,219 miles flown.

Doctor Defends High Heels

High heels have kicked up a lot of discussion, pro and con, but have found a staunch defender in Dr. Fraser Gurd, of McGill University Medical School, Montreal. The devoted he, he told the practitioners attending the International Medical Assembly at Minneapolis, not only eliminates the cause of flat feet, but prevents the wear from fracturing her ankle in case of a fall.

Wm. C. P. R. Scholarship

Clifford Brown, Lennoxville, Quebec, has been awarded the Canadian Pacific Railway scholarship at MacDonald College in connection with the Junior Club competition held recently at Sherbrooke, according to an announcement made by Dean Harton of MacDonald College. The successful candidate entered the Diploma Course at MacDonald, commencing on November 1.

One hundred boys from club all throughout the province took part in those competitions and, of these, thirty-seven were eligible to compete for the scholarship, offered by the Canadian Pacific Railway Company. These thirty-seven boys came from twenty-one different clubs and seventeen counties in the province extending from Argenteuil on the north shore of the Ottawa to Tumbago on the south shore of the St. Lawrence.

Clifford Brown, a member of the Lennoxville Club, obtained a score of 543 out of 600 on judging, 96 out of 100 on his general efficiency as a club member, 45 out of 50 on an oral examination, and 35 out of 50 on his exhibit, a total of 719 out of a possible 800 points. His nearest competitor was Stanley Dolg of St. Jerome, who obtained a total score of 714 points.

The scholarship is tenable at any agricultural college in the province of Quebec, and the winner elected to attend MacDonald College.

Housekeeper Gets Exercise

Walks Yearly Distance Equal To San Francisco From Boston

For some time elaborate tests have been conducted to ascertain how far various types of people walk as they do their usual work or play. It has been learned that we average almost 8 miles a day, although a policeman was checked at 14 miles a day and a letter carrier at 24. A porter walked 8 1/2 miles playing 16 holes (no mention was made of his score).

A housekeeper, without leaving the house, walks every year a distance equal to that from Boston to San Francisco, but when this woman goes down town to shop she averages about 8 1/2 miles in the stores alone.

The Geodetic Survey of Canada, of the Department of the Interior, plays an important role in the development of the Dominion, providing by its work an accurate basis for all kinds of other surveys whether relating to the making of maps or charts, the laying down of interprovincial and other boundaries, or the construction of power-houses, dams, canals, railways, irrigation, ditches and the like.

Flood lighting of church exterior is being tried in England.

Chinese Taking Over Jobs

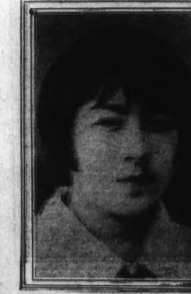

The day when a foreigner could obtain a good job with the Chinese government, and amass a fortune in a few years, is apparently over. Highly trained, Chinese are replacing foreign employees in almost every branch of the Chinese government service. A month now seldom passes but what several foreigners who thought they had life jobs, see their posts turned over to the Chinese.

Canada's First University

In the town of Windsor, Nova Scotia, a tablet has been erected by the National Parks of Canada Branch, Department of the Interior, commemorating the founding of King's College, in 1789, the first university in Canada, and the oldest in the British overseas dominions.

Mind-Should-Keep Pace

Natural To Suppose Healthy Old People Would Have Active Brains

An eminent United States surgeon, and doctor, discussing efforts to be made to extend the span of human life, has stressed what he considered the futility of added years of bodily strength if the mind continued to weaken about the usual time. But would it? Isn't it logical to suppose that if the sound body be carried on toward the century mark in man's life the sound mind will keep it company? This authority rather scoffed at the idea of promoting greater length of years, but this is not a good attitude to adopt toward old people. There is nothing more beautiful in life than serene and happy old age accompanied by good health, even though physical strength be weakened.

The garnered wisdom of a life well lived develops in the minds of old people a philosophy that should be the envy of those who still are struggling in the vortex of worldly activities, competing in the mad race for wealth, fighting for eminence in public affairs, striving after social distinction, and the other evanescent glories of the world. Old people do not care anything about these things. They have seen wealth vanish in a day; they have seen the public turn and rend its favorites of yesterday; and they know that the top of the social ladder is a position of the greatest peril.

If youth would listen to old age, benefit by its advice and experience, and pursue a more rational method of living, there would be more vigorous centenarians than there are today, and no doctor or other authority, no matter how eminent, would dare hint that they are only in the way. Longer and longer live the old folk!—Toronto Globe.

Playing Steady Game

Good Gutter Tells What Is Wrong With Business

The business visitor responded to the usual question of "How's business?" with this parable.

"I play golf and enjoy it. My normal game is somewhere around the middle 90's. The other day everything was just right, my temper and my digestion and the weather and the greens and all the things that help or hinder the game. The result was that I made a 79."

"Now suppose, when I'm asked what sort of a game I play, I should say, 'Oh, I break 80.' Suppose I should feel that everything was wrong every time I don't land in the 70's. What kind of time would I have as a golfer?"

And that's been one of the troubles with business. Many companies "break 80" in the first half of 1929, and because they failed to do it in the first half of 1930 they think they are completely ruined when, the truth is, they are playing a good steady game and improving a little bit every day.—Nation's Business.

Resume Reindeer Trek

Delivery Of Herd From Alaska Will Likely Be Effected On Time

Canada's herd of 3,000 reindeer is once more on the trek across the roof of the world. Latest advice to the Interior Department at Ottawa, indicates the drive of these animals, which was temporarily suspended during the summer and fall months, has been resumed and delivery of the reindeer on the eastern slopes of the Mackenzie River delta will probably be effected as scheduled this year.

When the drive began last November, the stipulation was that the animals should reach the grazing grounds near the mouth of the Mackenzie River early in 1931. Purchase of this number of reindeer from the Loman Corporation of New York was made by the Canadian Government in order that the Eskimos and Indians in that northland might have their food supplies supplemented.

Private 'Planes In England

The number of privately-owned aeroplanes is steadily increasing in England. Nearly 300 men and women in the country now operate their own 'planes and more than 24 own two or more ships each. Many business men are acquiring 'planes for their salesmen, and one quarry uses 'planes to send out samples of stone by air to its customers.

Captain and mate wrote the ship's log alternately, and the mate being drunk, the captain faithfully recorded: "The mate is drunk today."
On the following day the mate, seeing what had been entered concerning his own condition, being drunk, the captain faithfully recorded: "The captain is sober today."

Problem Of The Firm

Chances Have To Be Taken On All Round Profitable Harvest

Think farmers already whose destructive forces, competing efforts to the world of science, and of enterprise, perished on the millionth chance. "She's as safe as a house," said the designer of her steamship, "except for the millionth chance." Unfortunately for her, the adverse powers that lurk about every life and every enterprise saw to it that this triumph of human skill and daring should be confronted by that chance. When so much of this mechanism designed to show man's conquest of the air proved as helpless as a bubble in Niagara gorge.

Farmers are continually confronted with the millionth chance. Some seem to be able to dodge the issue or what is more likely, they are dealt with so tenderly by the forces that work for man's defeat that they rarely never have any serious difficulties. In many cases they listen to their own conceits, or, what is more fatal still, they listen to the words of the flatterer and become a little more daring and reckless generally. Then the millionth chance emerges and the cattle will not follow probably, the grain is caught with heat or drought at the wrong stage of its development or they sail at the wrong period of the market investments go wrong, persistently and proud man is tossed up on the shores of failure. For a farm has more problems than any airship in existence. The dairy, the poultry, yard, the field—all these bristle with problems. There are all the risks of the market and of social life. Wise folk sometimes smile at the farmer's maxim, "You never can tell," but those few words express precisely the atmosphere in which the farmer persistently lives. An airship is far more likely to make a successful voyage than is a farm likely to yield an all-round profitable harvest.

Light In Ocean Depths

Recent Discovery Shows It Is Purest Violet Color

Levels of color provided with violet-colored daylight, like a scene in the theatre illuminated with the purest violet light, are reported by the American Museum of Natural History as a recent discovery of the expedition of the New York Zoological Society, now exploring the ocean off Bermuda. Dr. William Beebe, leader of the expedition, made fifteen deep-sea dives, some to depths of over 800 feet, using a new steel diving sphere. Windows of clear fused quartz withstood the outside pressure of over six hundred pounds to the square inch and permitted the observer to look out. Close to the sea surface, they found, the light was ordinary daylight but as the sphere descended all red and yellow colors of the spectrum faded out completely. Next the blue color faded, leaving nothing but the pure violet rays at the extreme end of the spectrum where the wavelength of light are shortest. At depths of 700 feet and below the world of water still seemed to glow dimly with these extreme, almost colorless violet rays.

Likely To Be Popular

Increased Demand For Canned Whole Chicken Is Expected

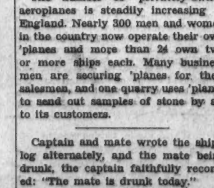

In his annual report, recently published, the veterinary director general of the Dominion Department of Agriculture calls attention to the increase in the number of poultry products processed under government inspection. The packing trade is canning more meats and poultry in Canada, and there appears to be room for considerable development in the field of canned chicken. Canned whole chickens made its appearance on the market last year and from the reception accorded it, the new business is likely to develop into one of considerable proportions.

Canadian Cattle Welcome

A welcome for Canadian cattle at the port of Birkenhead, England, was promised by Mayor T. McClellan, when the meat trade section of the National Union of Distributive Workers, of which he is national organizer, made a presentation. They could confidently expect to receive a considerable proportion of the 15,000 cattle available for export before the end of the year, he said.

There are more than 8,000 varieties of dahlia on the market.

There are more than 8,000 varieties of dahlia on the market.

"That stupid Frenchman is sitting on my hat and I don't know a word of French!"—Hummel, Hamburg.

Army Of Enumerators Will Be Employed In Taking The Decennial Census Of Canada

Fourteen thousand enumerators, 245 commissioners to direct their work, and a considerable number of others, will start employment next year in the taking of the decennial census of Canada.

The commissioners—one for each electoral district—will be appointed right after New Year while the enumerators will be chosen in March or April, to permit of study and instruction prior to the actual date of the census, which will be on June 1st. The census taking, of course, will require considerable time, varying in accordance with the area covered and the density of population. But what is to be put down are all the facts and figures as they may be on June 1st, regardless of what changes may occur later, before the census is published. It is necessary to fix on some arbitrary date.

Awaiting the approval of the Government just now and to be promulgated as soon as this summer is forthcoming are the regulations governing the census of Canada. There are several new features. Great successive census being more elaborate, past experience not only here but in other countries will be availed of. The Bureau of Statistics is constantly exchanging ideas with the international statistical organization. In the new schedules, complete as they have been, heretofore, there will be further details of agriculture and industry, and the point over which some contention has arisen as to Canadian nationality will be covered. A person who says he is simply a Canadian will be put down as such, although it is denied that in the past it was impossible to make such distinctions.

The census must also take into account some seeming anomalies in the law. For example, under the immigration act, even a Britisher must be in Canada for five years before he can acquire Canadian domicile, and yet if he has been here only six months he can vote or even be eligible for election to Parliament. The schedules will be so numerous as to set forth all the facts concerning the individual and his origin from away back.

One of the entirely new features this time will be the use of aeroplanes in the northern regions, which, 10 years ago, had to be covered on foot or by canoe or dog train. Incidentally, the tabulation is so delayed until these returns come in. Next year, they will be as prompt as the rest.

While the census is taken completely only every 10 years, check on it is kept from year to year, and the figures are such as to indicate a normal growth but no extraordinary increase in population. Although quite an army of conscript people will be required for the census business, the problem will be only one of selection, because there will be plenty seeking the jobs. The appointments are to be made by the Government, and not under the Civil Service Act, and so political influence may count.

Predicts Speedier Planes

Rocket Craft Expert Believes 5,000 Miles Per Hour Possible

Herr Fritz Von Opel, German rocket craft expert, predicts the airplane of 12 years hence will be a rocket propelled conveyance that will fly 25 miles above the earth at a speed of 3,000 to 5,000 miles an hour.

"I not it sounds ridiculous to talk of travelling 5,000 or even 3,000 miles an hour," said Von Opel, "but in a few years that speed will be commonplace. Theoretically my experimental planes will do that now, but they have not been developed on a practical basis."

The United States has at least 80 species of native golden rod.

Encourage Swine Industry

Saskatchewan Government Arranges For Easy Purchase Of Breeding Stock

Encouragement of the swine industry in Saskatchewan is promised under a new arrangement, according to Hon. W. C. Buckle, Minister of Agriculture. Under this arrangement, farmers will be enabled to purchase sows for breeding purposes through the Department of Agriculture upon making a payment of 25 per cent. of the cost and giving notes for the balance.

"In recent years, while we had a 50 per cent. cash option for the purchase of swine," Mr. Buckle said, "most farmers preferred to pay cash. This year on account of the scarcity of money, we are inaugurating this new plan."

(By Annette)

Barley and corn are both known as high carbohydrate feeds, and with the exception of the difference in hull formation and in the vitamin content of the yellow corn pigment, may be considered in much the same light as fairly strong heat producing and fattening feeds. Should the price spread favor barley to any extent during the coming winter and especially if the feed or has a quantity on hand, he should be quite safe in using a considerable portion of it in place of the corn he might ordinarily buy.

Substitution Of Barley For Corn

Experimental Stations Are Testing Feeding Value Of Both

A question which is causing considerable study this year is that of reducing the amount of corn purchased by Canada and the substitution of barley, a home-grown feed. The feeding value of barley as compared to that of corn is being given careful study at several experimental stations and already here have been several definite recommendations made for the use of this grain in at least partial replacement of corn.

The large part of the Canadian importations of corn go to the feeding of hogs and poultry. For the former, the barley has been long proven to rival corn as a feed both in its value as a fattener and for a part of the ration of the growing hog. The quality of finish produced by barley, in conjunction with other feeds is generally believed to be superior to that of the corn-fed hog.

In the poultry industry, the use of barley in place of corn is not nearly so well established. There is a certain vitamin value obtained from the use of yellow corn in the poultry ration which is rather difficult to replace when other feeds are substituted. General indications are, however, that the corn content of the laying mash can be substituted at least partly by barley, and with the ordinary spread in price between the two, it will probably be found profitable to do so. For fattening chickens there is reason to believe that a good percentage of well ground barley in the feed will work out quite satisfactorily.

Barley and corn are both known as high carbohydrate feeds, and with the exception of the difference in hull formation and in the vitamin content of the yellow corn pigment, may be considered in much the same light as fairly strong heat producing and fattening feeds. Should the price spread favor barley to any extent during the coming winter and especially if the feed or has a quantity on hand, he should be quite safe in using a considerable portion of it in place of the corn he might ordinarily buy.

Saskatoon Poultry Association

Egg Laying Contest Organized To Run For A Year

The Saskatoon Poultry Association has organized an egg laying contest beginning November 1st to run for a year on similar lines to that of the Dominion Government. The object is to secure for members of the Association trap nest records of individual birds for the twelve months which will furnish valuable data to those who are desirous of increasing the egg-laying propensities of their flocks, but who have not time nor facilities for conducting the breeding of particular birds that will lay a probable number of eggs of good size and color.

B.C. Motor Truck Company

A motor truck manufacturing company established in Vancouver 21 months ago at a cost of a quarter of a million has been very successful, its production for the first nine months of the year more than equalling that of the whole of last year.

"Silence gives consent, you know."

"Except when you ask a banker for a loan."

HEAVY WINTER TRAVEL IS PREDICTED

Here-in picture are some of the reasons advanced by Canadian Pacific Railway and Steamship officials for a prediction of heavy winter travel on the pacific this year. Lower left, a scene at the Empress annual regatta winter golf tournament in Victoria. In the middle, a scene from the principal events. Top right, the Canadian Pacific steamship, "Pacheco," with other ships of the line, will take thousands of holiday makers to the Old Country for Christmas. Lower right, a scene at the annual Regatta in Victoria, to be held after New Year at the month's resort.

Canada's Fish Industry

Should Get More Support From Canadian Consumers

Business can be stimulated, and more work can be found for our own people through the persistent purchase of Canadian instead of foreign goods. In no sphere of life can this policy be more easily followed or its good effects be more quickly seen than in the everyday life of the household, especially of food. It is strange that though Canada has the finest fisheries in the world, the consumption of fish at home is relatively small; and, at the same time, we seem to think it necessary to buy considerable quantities of foreign fish year after year, the imports in 1923 amounting to no less than \$4,174,568.

If we reduced the imports of foreign fish and eat more of our own the fishing industry would benefit enormously, and no industry is more worthy of encouragement. Fishermen, both inland and on the two seas, are plain people who try almost exclusively goods made in Canada. Is it not reasonable for consumers in Canada to reciprocate by making more use of Canadian fish, and thus to increase the purchasing power of Canadian fishermen? The industry has an importance which perhaps people will live inland do not appreciate, for the capital invested in it is nearly \$60,000,000 and the annual production is worth more than \$100,000,000. The money realized from the fisheries is spent with manufacturers of iron, brass, rubber, cordage, fur, textiles, engines, clothing—in fact, its ramifications are felt throughout the country, and directly or indirectly it gives employment to many thousands of workmen; hundreds of miles away from the scene of operations. If each family in the land consumed even a few more pounds of Canadian fish it would give a great stimulus to an industry which already contributes so largely to the prosperity of Canada—Toronto Mail and Empire.

Livestock Sales

Figures For Past Ten Years Shows Heavy Business Done At Moose Jaw Stock Yards

"During the past ten years," says "The Optimist," "some 792,994 cattle, 51,081 calves, 696,345 hogs, 258,944 sheep and 15,112 horses were handled through the stock yards at Moose Jaw, according to figures compiled by the Southern Saskatchewan Co-operative Stock Yards. In other words, more sheep and swine were handled through the Moose Jaw pens in the past ten years than the entire number of sheep and swine present in Saskatchewan in 1923." In that year there were in Saskatchewan 1,169,913 cattle, 207,551 sheep, 599,009 swine and 1,122,787 horses.

Furnished Enough

The scene was a revival meeting, and during the course of the evening a masculine woman rose and spoke on the value of kindness. "Look at my husband," she said: "He's allus been a terrible trial; but how does I treat him? When he comes home from 'The Pig and Whistle' the rum for drink, what does I do? Do I hit him? No. Do I clear out an' leave 'im? No. I just puts me arms round his neck and kisses him."

A voice from the back of the hall called out, "Serves 'im jolly well right."

Howell—Do you work for a living?

Powell—I work for it, but I don't get it.

Study Of The Whole Field Of Federal And Provincial Taxation Is Thought Necessary

The ever widening problem of raising revenue for the various purposes and public undertakings by both provincial and the federal governments, has reached a stage that calls for thorough examination of the whole field of taxation, according to views advanced at the convention in Toronto, of the Canadian tax conference and the Canadian civil service research conference.

With delegates in attendance from widely separated parts of the Dominion, the conference applied itself to the study of the country's tax structure and offered suggested remedies in meeting some of the more outstanding problems.

Duplication and lack of uniformity in taxes levied in the various provinces, should invite tax reformers into action, declared A. E. Cryer, of Toronto Board of Trade. Lack of uniformity, he said, proved a baffling problem for business interests operating over a large section of the country, while overlapping arising in connection with the income tax has often considered "unfair."

In a paper submitted by Prof. H. R. Kemp, Department of Economics, University of Toronto, two primary problems were set forth: How to secure increases of revenue needed to meet the commitments of the Dominion, and how to improve present arrangements for obtaining revenue.

The Federal Government, he said, faced a deficit of about \$40,000,000 while the provinces and municipalities were also confronted with the need of augmented revenues to meet obligations and undertakings. As a meeting these needs he suggested excise duties might be levied on certain low-priced commodities, citing sugar as an example. This suggestion, however, met with disfavor in the subsequent round-table discussion. Prof. Kemp believes there were other channels of revenue that might be explored, with the federal income tax probably slightly raised.

As a remedy for some of the existing tax evils, Prof. Kemp advised a thorough investigation into the double taxation of corporation incomes, periodical conferences be-

Shows Great Variation

Every Country Has Its Own Manner Of Eating

Nothing is more curious than the different manners of eating which are correct in different countries. We leave accidentary cravies on our plates, because of manners which we should seek it up with a piece of bread. Yet in France to leave that gravy would be considered extremely rude, and the daintiest dinner would certainly chase the last elusive drop round the plate with a soft piece of bread. The correct way to sup soup with us is from the side of the spoon, but to do this in Germany would mark one as not knowing the habits of polite society; there must be inhaled from the end of the spoon. Another—to us curious custom is the French one of resting the hands always on the table, directly they have finished a course; to sit with them in the lap is not good manners. This reminds us of a story a woman told one of a foreigner her father asked to the house. At dinner the first night asparagus was served, and the visitor, having watched curiously what other people did, ate it in his fingers as to the manner born. The next night leeks appeared as a vegetable, and the young man, quite sure of himself this time, started on it happily, taking it in his fingers as he had done the asparagus. Now, did the laws of perfect breeding demand that all the people in the house should follow suit, or not? It is related of a perfect host that on one occasion when entertaining some visitors whose table manners were not very civilized, and who took up his finger bowl, and drank from it, he, after one glance round the somewhat untidy table, took up his finger bowl, and also drank from it!

The Magnetic Compass

The magnetic compass has been in common use for more than 700 years and it is more widely used today than ever before. On the sea, under the seas, on, above, and under the earth it is used for finding direction. It is necessary to the sailor, adroit or in a submarine, to the surveyor and explorer on land, to the aviator who flies overhead, and to the miner who burrows below in deep pits.

The pathway to success may be uphill—but it never is crooked.

seven provincial authorities, and a general study by everybody interested of the whole subject of public debts and taxation.

Alluding to taxation in relation to the country's net production, Mr. Cryer stated that in 1923 the increase in taxation revenues had been more rapid than the increase in the total net production. In that development he detected a dangerous point. "We may soon have the heaviest taxation of all imposed on the citizen in the least of all years," he said.

A paper by J. G. Hay, Commissioner of Taxation in Winnipeg, dealing with assessment of urban land for taxation purposes, provoked general discussion.

Mr. Cryer, reviewing taxation changes in 1930, stated the present trend was to extend the gasoline tax and relieve income tax payers. It was recognized, he said, the income tax was unpopular because of its tendency to penalize the honest to the advantage of the dishonest. Such a "lively legislative interest" and a "progressive softening" of the income tax.

A one-cent-per-pound tax on sugar said Prof. Kemp, would raise at least \$900,000 a year for the Dominion. "Sugar," he argued, "is now selling at a price no higher than that prevailing before the war, and at less than the cost of production. Such a tax, though retrogressive, would perhaps not be unduly burdensome to consumers who have paid over 25 cents a pound for sugar in the past."

Two prominent Toronto businessmen, William C. Coulter and George Bridgen, led the general attack on the proposed sugar tax. Mr. Bridgen asserted the governments of the world could not afford to tax against excise taxes on such necessities when Britain lost the American colonies through the tea tax.

It was also suggested by Prof. Kemp that collection of municipal income taxes be made by the federal authorities, who would then turn the amount over to the municipal authorities. This he said, would increase the net revenue from the tax. Various public utilities also could yield large revenue in case of necessity," he added.

Champion Sheep Shearer

Interesting Contest At Saskatchewan Annual Sheep and Swine Show

H. Swinehart, Hinton, was adjudged the champion all-around sheep shearer when a contest was held at the exhibitors grounds, Regina, in connection with an annual Saskatchewan sheep and swine show. A Simpson, Regina, gained second place in the contest, which was judged by W. C. Heron, Hinton; L. J. Ruethon, Rocanville, and W. W. Thomson, western manager of the Canadian Co-operative Wool Growers Association.

Sheep shearing results follow: Hand shearing contest—1. A. Simpson, Regina; 2. H. Swinehart, Hinton; 3. Archie Stewart, Abbotsford; 4. Calvin Fraser, Mather, Man; 5. J. Whitehead, Nutana, Sask.; 6. Ben Wilson, Shellbrook; 7. J. Bayne, Regina; 8. John Brisbane, Laura.

Machine shearing contest—1. H. Swinehart; 2. John Jones, Bangor; 3. J. Whitehead, Nutana.

Arthur Howes, Hinton, was announced the winner of the Heron challenge cup, donated for annual competition by W. C. Heron, Hinton, Sask., for the best Saskatchewan bred Oxford sheep, three years or under. The cup was won in 1923 by A. M. Barnett, Hinton.

New Exchange Building

The officials of the Winnipeg Stock Exchange are being commended for their decision to go ahead with their construction programme which involves a new exchange building to be erected on Main Street at a cost of about \$25,000.

"Where are you hurrying to?"

"I am witness of a misfortune."

"What is that?"

"Male is getting married."—Hummel, Hamburg.

How Women Lose Fat In England

How would you like to lose unsightly fat that you don't need and don't want, and at the same time feel better than you have for years?

How would you like to lose your double chin and your too prominent abdomen, and at the same time feel your skin so clean and clear that it will compel admiration?

How would you like to get your weight down to normal, and at the same time develop that urge for activity that makes work a pleasure and also gain in ambition and keenness of mind?

Get on the scales to-day and see how much you weigh—then get a bottle of Kruschen Salt. Take one-half teaspoonful every morning in a glass of hot water, and when you have finished the first bottle weigh yourself again.

Now you will know the pleasant way to lose unsightly fat, and you will also know that the six vitalizing salts of Kruschen have presented you with glorious health.

That's the way Englishmen keep slim—why not you?

WORLD HAPPENINGS BRIEFLY TOLD

A small sheet of the first commercial zinc produced in Manitoba was sent Mayor Webb by officials of the Hudson Bay Mining and Smelter Company at Flin Flon.

Toronto's first and only woman band, 17-year-old Kathleen Boyle, of Buffalo, N.Y., sentenced last April to two years' reformatory, has been released on parole.

A stump buried through the roof of the camp building during blasting operations killed the infant daughter of Mr. and Mrs. William Schuster, Sugar Lake, B.C.

With the immediate object of putting the Canadian fishing industry on its feet, Hon. E. N. Rhodes has arranged for an exhaustive survey of marketing catches at every stage from the fisherman to the consumer.

Canada could aid in the economic recovery of Australia by buying more Australian goods, Lord Stonehaven, former governor-general, said in an address to the Canadian Club at Victoria.

Announcement has been made by E. W. Beatty, president of the C.P.R., of the acquisition of a site facing Berkeley Square for the big hotel proposed to be erected by the company in London, England.

A telegram from Tientsin announced the death of Bertram Lennox Simpson, British author, who wrote under the name of Putnam Weeks, from wounds inflicted by three Chinese gunmen who invaded his house and shot him in the back.

The Prince of Wales is understood to be planning to sail for South America, January 15, on the trip which has been arranged for him to open the British Trade Exposition at Buenos Aires. He will pay visits to other parts of South America and the West Indies.

Grassy Lake Coal

Coal Obtained By Methods New To Commercial Mining In Alberta

The recent shipment of a car of high grade lump coal, billed from Grassy Lake, Alberta, to Winnipeg, is of unusual interest. Apart from its marking the revival of coal shipments for Grassy Lake was shipping coal to Saskatchewan in 1908—this shipment has a special interest in that the coal was obtained by methods new to commercial mining practice in Southern Alberta. Future shipments will be watched with considerable interest.

Holestein Herd Has Good Record
Three Holestein cows, members of a herd owned by James A. Thomson of Moose Jaw, have just finished yearly records in the R.O.P. with a production averaging 13,657 pounds of milk containing 657.50 pounds of butter.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which irritate the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cause cramps and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleaned and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red packages.

The Deadly Monoxide

Four Points Motorists Should Remember About This Poison Gas
Every motorist who is tempted on cold mornings to start his car in the garage and allow the engine to warm up with the doors and windows of the building closed, should remember these four points about the deadly carbon monoxide gas—

You can't see it!
You can't smell it!
You can't taste it!
But it is deadly!

Keep the doors and windows of your garage open when you have the motor running, or better still, don't let it warm up until you are in the driveway.

Don't run your motor in a closed garage. Statistics show that the hazard of carbon monoxide poisoning, while not very prevalent when compared with other accident dangers, is gaining rapidly. Last year there were more than twice as many deaths from this cause as in 1924. In 1925 and 1926 death rates from carbon monoxide poisoning showed a steady increase.

Many physicians claim there is no antidote for it. The first thing to do is to get the victim out into the air as quickly as possible, endeavour to bring him back to consciousness by means of artificial respiration and, possibly, use oxygen.

Many physicians claim there is no antidote for it. The first thing to do is to get the victim out into the air as quickly as possible, endeavour to bring him back to consciousness by means of artificial respiration and, possibly, use oxygen.

Some Mighty Midgets

Many Small Creatures Stronger In Comparison Than Large Ones

It has been proved that the common mouse can draw a load which is fifty times heavier than itself. If an elephant were as strong, in proportion to size, it would have to move nearly 270 tons.

That is only one specimen from Nature's collection of "mighty midgets" that perform in secret on land and in the sea.

Even the strongest men find it difficult to lift more than their own weight. Yet, a bluebottle fly can lift more than 30 times its own weight, while it can draw a load that is 150 times heavier than itself.

Objects which are about forty times heavier than themselves are often carried by the mason wasps.

You have seen those ear-splitting powerful drills which are used to tear up the road? Well, there is a mollusc, known as the pilldock or phidolac, which can rival their power, and is a superior worker, as it makes no noise.

Silently, but none the less efficiently, the pilldock bores through the hardest rock as casually as if it were soap.

Recipes For This Week

(By Betty Barclay)

OATMEAL COOKIES
1½ cups special cake flour, sifted.
2 teaspoons baking powder.
½ teaspoon salt.
2 teaspoons cinnamon.
1 teaspoon clove.
½ cup butter or other shortening.
1 cup sifted brown sugar.
1 egg, well beaten.
1½ cups oatmeal.
Sift flour once, measure, add baking powder, salt, and spices, and sift together three times. Cream shortening, add sugar gradually, and cream well. Add egg. Add oatmeal and flour, alternately with milk, mixing well. Drop by teaspoons on greased baking sheet and bake in moderate oven (350 degrees Fahrenheit) 18 to 20 minutes. Makes 4 dozen cookies.

THANKSGIVING CONSERVE

3 cups cranberries.
1 cup diced apples.
1½ cups water.
1 cup crushed pineapple.
1 lemon, juice and grated rind.
2 oranges, juice and grated rind.
3 cups sugar.
Cook cranberries and apple in the water until tender. Add pineapple, lemon and oranges and sugar. Mix well and cook rapidly until thick and clear. Turn into sterilized glasses and when cold cover with paraffin.

Evidences Of Prosperity

Times Do Not Appear To Be So Bad In This Western City

Among a number of evidences of prosperity in Edmonton, cited by "The Journal," is the fact that the number of telephones in use has increased within a year from 16,124 to 16,841, or over 500. Another evidence is that "one wholesale house in this city sold \$30,000 worth of radio sets in September"—thus showing a fair volume of luxury spending.

Award For Canadian Scientist
E. M. Kindle, chief of the division of paleontology, Dominion Department of Mines, is the recipient of an award by the United States National Research Council, it is announced at Ottawa. The award was made in recognition of Mr. Kindle's geological investigations.

Lubricants are being made from olive oil in Spain.

Chapped Skin

Wind, snow and sleet bruise unprotected skin surfaces. Minard's healing cream softens skin tissue and affords full protection.

SUNDAY SCHOOL LESSON

THE RICH YOUNG MAN—REFUSING A LIFE OF SACRIFICIAL SERVICE

Golden Text: "And He said unto all, 'If any man would come after me, let him deny himself, and take up his cross daily, and follow Me.'" Luke 9:23.

Lesson: Mark 10:17-27.
Devotional Reading: Psalm 19:7-14.

Explanations and Comments

Refusing a Life of Sacrificial Service, verses 17-22.—In Matthew the rich young man's question reads: "What good thing shall I do, that I may have eternal life?" and Jesus replies in "Why askest thou Me concerning that which is good?" Mark and Luke give the question as, "Good Master what shall I do that I may inherit eternal life?" and the reply of Jesus is "Why callest thou Me good? None is good save one, even God." Jesus' question as given here seems to indicate that the young man had used the word "good" (Good Master) with as little thought as we do when we say "Good Morning." Jesus would have him weigh his words and see whether he meant what he had said. If he were calling Him good in the sense in which God is good, Jesus would accept his homage. Jesus always wanted those who came to Him to know what being His disciple meant, and to follow Jesus, do you know what that meant? It meant that of such a step before entering it.

What Following Christ Meant.—If this young man meant the right choice, if he had gladly agreed to give his possessions to the poor and to come and follow Jesus, do you not think that Jesus would then have said to him, "You may keep your wealth and use it rightly for those you are no longer under its snare, you have ceased to put it first in your thoughts, you now have room in your heart for me?"

The Choice of the Rich Young Man Made.—It was a dramatic moment when the young man was face to face with Jesus and He told him of the difficulty of the spiritual life for the wealthy shows that the young man's decision when he turned away sorrowful, was to keep his wealth and not follow the Master. Wealth which another rightly might possess and rightly use, was for him a snare, for it kept him from following Christ. Not only did he have great possessions, but the great possessions had him. He loved them too much. They deprived him of a vision of God and of the needs of others.

"His soul was like a boat tied fast, but tied with a long rope," said Phillips Brooks. "It was able to struggle up the channel, past headland and light and buoy that marked the way; but always something held it back from perfectly laying itself out and reaching the golden shore. 'What lack I yet?' And then the sea came and all that that thou hast, and thou shalt have treasure in heaven; and come and follow me." He did not say, "It is wicked to be rich." He only said, "You will be free if you are poor, and then I can lead you to the Father, in whom you shall find yourself." He went back, past the buoys and headlands, down the bay to where the rope was tied, and cut the boat loose from its anchorage.

Angus: If you've found such a valuable ring the law requires that you advertise for the owner.

Sandy: My, mon, and which newspaper has the smallest circulation?

A folding house, which may be packed into a box and wheeled behind an automobile, is a German invention for use on week-end trips.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

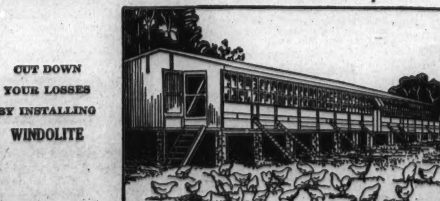

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.
51 Wellington St. W. TORONTO, ONT.

SOUR STOMACH

JUST a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard anti-acid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes. Don't depend on crude methods.

Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Remember—the genuine is always a liquid. It cannot be made in tablet form. Look for the name Phillips'. It is always on the wrapper for your protection. Druggists everywhere have the 50c bottles.

Canadian Tobacco Production

Total 1930 Crop Given As 36,712,700 Pounds

Enough tobacco has been grown in Canada, so that if distributed among the population would provide each man, woman and child with over 3½ pounds. The total crop for 1930 is given as 36,712,700 pounds or nearly 7,000,000 pounds more than in 1929. This year's crop was grown on 41,391 acres, 32,170 of which were in Ontario, 9,000 in Quebec and 221 in British Columbia. Ontario accounted for 28,078,000 pounds of the total production, Quebec, 8,480,000 pounds and British Columbia, 144,700 pounds.

For several years several million pounds of tobacco have been exported to the British Isles, and it is expected that this year a considerable percentage of the crop will be exported.

Salt Refinery Plant

The Arden-Vancouver Salt Company proposes to erect shortly a refining plant on False Creek to refine about 10,000 tons of salt yearly, bringing the raw product either from California or from the evaporation beds in the British West Indies.

Oil men have borrowed an idea from daymen by using the cream separator to extract petroleum from tar and sand.

One of the world's really "rare metals" is columbium, for only about 25 pounds of it exist today in sheets, bars, rods, and wire.

Horses From Royal Ranch

Exhibits From Prince Of Wales Ranch Win At Portland, Ore.

Eight Clydesdale horses and one Percheron exhibited from the ranch of H.R.H. the Prince of Wales, at the recent Pacific International Livestock Show at Portland, Oregon, carried off eleven first prizes and one second. The entries also were awarded all the championships in the Clydesdale classes, the one second prize being awarded in the case where two horses from the Prince's string were shown in one class.

The entries from the Prince of Wales ranch, which is at Pelsklo, Alberta, about sixty miles southwest of Calgary, were widely advertised prior to the opening of the show, and the horses were stabled in a special section decorated with the Prince's colours—scarlet and purple.

Canadian Exhibit Wins

The Canadian stand at the Ideal House Exhibition at Edinburgh, Scotland, has been awarded the gold medal for general excellence, beating out 100 other exhibitors. The stand was prepared by the Dominion Government Exhibition Commission.

Jones—Happy are they who look before they marry.

Bones—Yes, and overlook afterwards.

Glacier National Park, sometimes called the "trail park," has nearly a thousand miles of horse, foot, and fire trails.

End Pain, Swelling & Bleeding of PILES (HÆMORRHOIDS) With Zam-Buk Herbal Ointment.

Ointment 50c—Medicinal Soap 25c.

ENO'S FRUIT SALT

To Feel Your Best

Take a dash of ENO'S "Fruit Salt" in a glass of water every morning. Millions do this daily because they know that ENO-gentle, effective, non-habit-forming—is the deadly foe of constipation.

In cases of acid stomach, fatigue, biliousness—ENO is invaluable. For more than sixty years it has been the standby in thousands of well-regulated homes.

But remember, only ENO can give ENO results.

CHAPTER IV.—Continued.

"He wouldn't have complained in any case," Gay answered loyally. "That's Nick, Mr. Bartlett. He may not altogether like what life gives him, but he makes the best of it. By all the rules of the game he should be wading in the Pacific, or on the way there, but he has chosen to stick by me. I'm going in now to wash up. Train travel is an abomination. While I'm gone Nick can tell you our problems, and then I'll tell all the things he's forgotten."

She arose, her hand tightening a bit on her husband's shoulder, and with a smile for the old man she went within. Nick sat quite still for a moment, looking down at the maples in the valley: a gorgeous panorama in gold and crimson.

"No," he said thoughtfully, harking back to the old man's question, "I've never set foot out of New England; yet I thought when Gay and I started off together—" He smiled, as if at visioning something very far away. Then the smile vanished, and he said soberly: "Mr. Bartlett, the biggest thing in life has come to us."

He looked up, meeting the old man's untroubled gaze.

"I ain't surprised," said Simeon Bartlett quietly. "Somehow I knew, soon as I asked what brought you home. Nothin' else would 'a' held either of you back from conquerin' the world. You—you ain't by any chance lettin' yourself feel disappointed, boy?"

"I can't you know, for Gay's sake," Nick answered quickly, "though I'll admit that for just a minute I was—well—stunned. All in a breath the plans of my whole life had to be changed about—changed quickly, so Gay wouldn't know I minded even so little. Perhaps you

can't understand, sir, but ever since I was a little shaver I've dreamed of doing what we set out to do. More than anything in the world I desired my freedom. Freedom! What is freedom, Mr. Bartlett, when the look in a girl's eyes has a greater hold on one than the broad highway?"

The old man rocked gently for a moment.

"Freedom," he said at last, "is just another name for happiness. Some find it some ways, Nick, and some others. They'll likely come times, boy, when the highway'll call so hard on you that you'll have to leave your runnin'; but the freedom a man finds in his wife's eyes ain't a bad sort to hold onto. You just hold onto it!"

"So far," Nick answered, with a queer little gesture of surrender, "it has held onto me!"

CHAPTER V.

In any New England state one can find Bakerville: a good-sized inland town where neighboring farmers come to trade on Saturdays, when Main Street is lined with teams and trucks. Its Common is bordered by ancient elm trees, amid whose boughs white churches lift their spires. There are rows of fine old pillared mansions—which seem to look down scornfully on the occasional dwelling of less stately architecture—quiet side streets, and winding byways.

The town lies in a valley, through which the river flows in a course quietly and decorously, as a river should. In spring-time, when it floods the meadows, it stops considerably at the roadsides, making as little "freedom" as possible for passers-by. Hills surround Bakerville on every side, sheltering it from cold winds in winter, but turning it into an inferno during July and August, so that the place has not been overrun by "summer people." Sometimes an artist braves the heat in order to paint the loveliness of the surrounding country. Occasional boarders come to farms on the hillside outside the town; but as a rule the inhabitants of Bakerville have been born and bred there.

On a May morning, four years after that day when Simeon Bartlett gave his free definition of the word "freedom," Nicholas Hastings stood in the doorway of the First National Bank of Bakerville, and drew a deep breath, preliminary to going in to the day's work. Spring was in the air and the tree-tops, painting the budding maples red—turning the orchards into bowers of beauty—tugging at Nick's heartstrings with the old, familiar urge.

Even Main Street, the least lovely part of Bakerville, looked shining. Store doors stood open, welcoming the warm air that was to make short work of the accumulated stiffness of winter months. At his fruit stand opposite, G. Leveroni was building a mound of oranges and pineapples, their golden beauty seeming to be part of the bright sunshine; and at the post office across the way the R.F.D. man was starting out upon his rounds.

"Gosh! I envy him!" said Nick, and did not know that he spoke aloud till someone answered.

"I do myself, Nick. A great day to be out. I've half a mind to desert the ship and take a holiday."

Nick turned with a smile to the bank's president, who had spoken.

"A holiday? I've almost forgotten what the word means. Take one by all means, Mr. Maxwell. I guess we can carry along without you!"

John Maxwell laughed.

"I'd jump at that advice if my car wasn't in the paint shop. As it is—"

He stopped, suddenly aware that Nick's attention had wandered. A blue roadster was standing before the post office, from which stepped a slender woman in a crisp gown that matched the car. There was something lithe and graceful in her figure that caught John Maxwell's eye. Pausing on the top step, she turned, and perceiving Nick, waved a greeting to which he responded with a gay

gesture and a quick lighting of his eyes, which, though lost on the lady across the street, was quite visible to the keen gaze of the bank president.

"Your new neighbor?" he queried, as she turned about.

Nick started, as if his thoughts were far away.

"Yes. Nice people—the Hallidays. She's an artist, you know. Her husband writes."

"Any children?"

"No. I believe they have some sort of notion that children would hamper their careers."

John Maxwell snorted with indignation.

"That's all I care to hear about 'em. How's Gay?"

Nick faced his questioner.

"Gay? What made you ask, sir?"

"Thought last time I saw her she looked awfully tired. Didn't like it, I'm very fond of Gay."

Nick smiled.

"I'm fond of her myself!" Then he said soberly: "The kids both indulged in whooping cough, you know, and Gay had sleep. She's not been right since—tired, I guess. Well (with a reluctant glance at the town clock), I suppose I must retire to my cage."

"A cage—for Nick?" murmured John Maxwell as the boy left him. He stood for a moment watching the lady in the blue roadster ride away. He frowned. Then his thoughts flew to Gay, and his face softened. "She's in a cage, too," he thought wisely, "only she doesn't guess it, bless her little heart! Well, I trust their new neighbor will keep her hands off Nick—and her eyes, too. She hasn't any babies to lose sleep over. No wonder she looks fresh as a new-blown rose."

Then, as reluctantly as Nick, he too, entered the portals of the First National Bank. But business was not pressing that morning, and his thoughts wandered. Why, he thought irritably, hadn't the janitor extinguished the furnace fire? The pipes of the radiator were still warm. He arose, opened another window, and in desperation threw wide the door to his private room. At eleven o'clock he decided he couldn't stand it. Passing Nick's cage he said: "I'm taking your advice—till after dinner. Thunders! this place is stifling! Why don't you open something more?"

Nick made a discouraged gesture toward a stenographer.

"She's got a cold. She always has a cold—can't stand a draught, so the rest of us suffer. A draught. The day like this! If you'll kindly forget to close the door when you go out I'll award you a medal for saving one life at least."

"It would be the first I ever received," laughed John Maxwell as he obeyed.

He stepped outside, drawing in a deep breath of the welcome air. His own home lay to the north, but something drew him in the opposite direction—possibly the sight of a blue roadster turning a corner. He followed it, and came out on the house once occupied by Selma Smith. There he paused, surveying the old-time garden that had been restored. A rickety cow shed had vanished, and in its place stood a trim garage, connected with the house by a pergola, which would soon be a wealth of climbing roses.

It was a good old house, thought John Maxwell. He was glad the new people hadn't spoiled it with a new cover, as the man who bought the Blodgett farm had done. Give it a year or two, and the garden would be a thing of beauty. And it was good to see a coat of new white paint, even though it made Nick's house next door look shabby. Yes, it did look shabby; there was no denying the fact; but painting cost in these days, and the boy's expenses had been heavy the last three years.

(To Be Continued.)

Some say the answer to "How can I live without her?" is "much cheaper."

YOUNG WIFE STRENGTHENED After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario.—"When I first took Lydia E. Pinkham's Vegetable Compound, I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl friend told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little baby boy."—Mrs. J. B. STALKER, Bancroft, Ontario.

Wonderful Diving Outfit

German Device Enables Man To Work At Great Depth

The salvaging of the German navy from the bottom of Bonga Flow was perhaps the biggest job of the kind on record. A wonderful feat it was, made comparatively easy, however, by the fact that the fleet lay in shallow water.

Hitherto, no great feat of salvage has been accomplished at a greater depth than 300 feet, and very few at that depth. But a German firm has constructed—that is the right word—a diving outfit that enables men to work at 400 feet or more. The Lustrania is in 500 feet of water off the coast of Ireland, and it is expected the dive will be able to get at her if they want to.

The German outfit can scarcely be called a diving suit. It is a steel house, from inside of which its single tenant is able to work. The head-piece is as big as the conning tower of a submarine. With its 5,000 candlepower searchlight, like a Cyclops eye, in front to penetrate the Stygian darkness of the sea hundreds of feet below the surface. It looks like a fabled monster. The working tools are manipulated from the inside of the outfit, and the divers have special devices to overcome pressure. There are thousands of ships down in Davy Jones' locker, containing, in the aggregate, money, gold and silver bars, jewels and other imperishable treasures of untold value. Most of it is probably irretrievably lost, but science is going to wrest a lot of spoil from the Old Man of the Sea in the not very far distant future.

A Simple Treatment For Children's Colds

Cold in the head is very common at this time of year, especially in the young. Neglect of a cold is prone to lead to serious consequences. To relieve all congestion of the system, relieve the suffering and ensure convalescence.

Baby's Own Tablets are without an equal for relieving indigestion, constipation and colic. They check diarrhoea, relieve colds and simple fever; promote healthy sleeping and make the dreaded teething period easy. They are sold by all druggists and dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Provincial Air Service

May Be Established Soon In the Western Prairies For Forest Protection

Inauguration of a provincial air service in the prairie provinces for forest protection may follow as a result of the transfer of natural resources, it is learned.

This phase of forest protection will be discussed between Rt.-Hon. R. B. Bennett and the premiers of the three prairie provinces on the return of the federal minister from London, England, it was stated by Premier Anderson at Regina. In lieu of instituting a provincial service in each province, an arrangement may be reached between the provincial and federal governments for the use of the Royal Canadian air force machines in forestry service.

Discussion of this matter came before the natural resources conference held at recently at Edmonton.

New Canadian Destroyer

The second of Canada's two new destroyers, the "Essex," was successfully launched at Southampton recently. Miss Mildred Bennett, sister of the Canadian Prime Minister, performing the christening ceremony before a distinguished gathering. The destroyer slid gracefully into its element bearing a large maple leaf across her bows.

"Buy a ticket for your concert? But I don't know you." "Yes, you do, sir. I'm the man who turns your water off when you don't pay the rates."

Every 40 seconds someone is either injured or killed by present day modes of transportation, experts claim.

Use Minard's Liniment For Tooth-ache.

Idea Proved Effective

Dresden Painter Tried New Way To Collect Money

A new and effective method by which an artist may exert gentle pressure upon an unwilling subject of a portrait has been successfully tried at Dresden. A young, unknown painter, having nearly finished a commission—likeness of one of Dresden's leading industrialists, was told that the agreed upon sum of \$500 would not be paid. The industrialist declared that the portrait bore not the slightest resemblance to him. The artist respectfully asked if he might have this statement in writing, as he had borrowed money on the expectation of being paid and wished to be able to show his creditor why he could not meet his obligation. To this the industrialist agreed.

Shortly thereafter at an exhibition a painting appeared entitled "Portrait of a Well-Known Swindler." Dresden, recognizing the likeness, laughed. The industrialist visited the exhibition, flew into a great rage and demanded the immediate removal of the picture. The artist blandly produced the signed statement asserting that the portrait bore no resemblance whatever to the sitter. The upset was that the industrialist decided to buy it for \$1,000.—New York Times.

League of Nations

Sir George Foster Sees Lack Of Interest Shown In Work At Present Time

Apathy towards the League of Nations is at the present time very apparent in Canada, in the opinion of Sir George Foster. At a meeting here of the central executive of the League of Nations Society of Canada, Sir George declared he had gained the impression in travelling over the Dominion last summer.

The Dominion government was apparently going to be up against a big problem in preparing its budget next year owing to prevailing conditions. Sir George told the executive, and he added the opinion that the society could hardly look for any increase on the grant the government makes for the carrying on of the society's work.

An intensive speaking campaign was one suggestion made as a means of reviving interest in the league and enlisted financial support. Sir George volunteered his services for a number of meetings if decision is reached to appeal to the public in this manner.

Interested In Grain Show

Directors of the Co-Operative Wholesale Society of Great Britain, who recently concluded a tour of Canada, have expressed themselves greatly interested in the World's Grain Show to be held at Regina in 1932, and have indicated that in all probability they will visit the Exhibition and Conference at that time.

As a veritable an excellent preparation is "Mother Graves' Worms." It has saved the lives of countless children.

New German Money

The Germans, this fall, are going to be presented with a new kind of paper money that has some remarkable claims made for it. It is a new type of paper currency guaranteed not to burn, tear or crumple.

"Ice Box Cookies"

1 cup butter; 2 cups sugar; 1½ cups flour; 2 eggs; 2 teaspoons baking powder; 1 cup nut meal; 1 cup raisins (optional)

Make the dough in a cool place and bake in a cool oven.

Little Helps For This Week

"Into Thine hand I commit my spirit."—Psalm xciii. 5.

Father, Thy hand the wild bird brings With fearless flight, from shore to shore, In that shattering peace it sings, How'er the tempest roar.

So tossed, so frail, so lone am I, Except that hand my guidance be, Hear Thou my fearful, hopeful cry, Dear Lord, lay hold of me.

—Rose Terry Cooke.

Cling fast to the hand that is leading you, though it be in darkness, though it be in deep waters, you know whom you have believed. Yield not for a single moment to misgivings about infinite souls. Infinite love, joined to infinite skill, shall pilot the way through every strait and temptation.—J. Alexander.

Persian Balm is a true elixir of youth. Refreshes and rejuvenates. Adds a youthful charm to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Indispensable to the woman who appreciates subtle distinction. Delightful to use. Delicately fragrant. Soothes dry and irritated skin. Corals and preserves. A flawless toilet requisite for every discerning woman. A true aid to beauty.

American Author Wins Nobel Prize

Sinclair Lewis Chosen For Honor This Year

Sinclair Lewis, noted United States author, has been voted the Nobel prize in literature, for 1930.

Sinclair Lewis was among United States authors prominently mentioned for the 1930 Nobel prize in literature which this year sets a new record of \$46,350. Theodore Dreiser was also prominently mentioned.

Among the best known books of Mr. Lewis are "Main Street," published in 1920 which brought him into international notice; "Babbitt" in 1922, "Arrowsmith" in 1925, and "Elmer Gantry" in 1927.

Danish pain with Minard's Liniment.

It was a wise man who said: "Smartness enables a man to catch fish, but wisdom tells him when to let go."

If baby has COLIC

ACRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

new Philco Baby Grand radio.

Mr. W. McRory was a business
visitor in Calgary on Wednesday.

Mrs. Gilchrist and Mrs. Waldock
spent Wednesday in Calgary.

Ray Gilchrist, Fred Pfeuti, Pete
Miquelon, Fred Patchell were Cal-
gary visitors the first of the week.

Miss Frances McFadyen left
on Tuesday to visit Mrs. Earl
Devins at Parkland.

Walter Gibson is hobbling round
these days suffering with an attack
of lumbago.

Everybody is going to the chicken
supper and dance at East Commu-
nity on Friday night.

Archie McFadyen states that
there is a big difference between
spring and fall acres when sown
to grain.

J. D. McKay of Calgary was a
business visitor in town on Mon-
day.

R. H. Hay, Leslie Spivey, Wm.
Murdoch and H. A. Banister were
visitors in Calgary on Monday
night.

Gordon Purvis has been re-engag-
ed as caretaker for the curling rink
and has already commenced flood-
ing.

Matimer Bros, south-east of
Bottrel had a record crop of oats
on breaking that averaged 132
bushels to the acre.

Joe Revege has returned from
his big game hunt on the Ghost
River. Joe is some what lame
and he is supposed to have been
kicked by a moose.

Mrs. O. E. Jones who has been
making rapid progress towards re-
covery following her recent op-
eration was able to be come
home on Saturday.

Tom Borbridge has the honor of
shipping the first carload of grain
over the new C.P.R. branch, when
he shipped a car of wheat from Nier
Siding on Wednesday.

The pupils of the primary room
went back to school on Monday
following a two weeks holiday
caused by the chicken pox out-
break which now seems to have run
its course.

No matter where you store your
car or truck for the winter, a short
circuit wire might start a fire. Bet-
ter insure it; the cost is very small.
Tom Tredaway specializes in car
insurance.

The law does not provide for a
fine to be imposed in the case of a
person operating a motor vehicle
whilst intoxicated.

Coming Events

Items under this heading will be charg-
ed for at the rate of 10c a line for the
first insertion and 5c a line for each sub-
sequent insertion. Church affairs at
half price; minimum 30c.

Novelty Tea, Sale of Home Cook-
ing, etc. on Dec. 6th in the U. F.
Hall.

Community Chicken Supper
under the auspices of the Floral
U. F. W. A. will be held at the East
Community Hall on Friday, Nov.
21st. Proceeds in aid of East
Community Hall.

"Artists Models" showing at the
Grand Theatre, Calgary, this week
with evening performances "for
men only" and matinees "for
women only" seem to have great draw-
ing power, judging by the num-
ber of Crossfield people who went
down to see it.

The bottom fell out of the turkey
market just before Thanksgiving
and even now it takes a good tur-
key to bring 20c a lb. Meat prices
are also away down. Flour prices
continue to hold firm owing to the
high cost of wheat.

Tuesday, November 25th, is the
date of the unreserved auction sale
of Garnet O'Neil's pure bred Here-
ford cattle. This is an exceptional
well bred bunch of cattle and are to
be sold to the highest bidder. Cat-
alogues have been printed and can
be secured from Mr. O'Neil, or from
Leslie Farr, Airdrie.

A box of a dozen Christmas
Cards, envelopes to match and a-
sals all for one dollar at the
Chronicle office.

Police Court News

On November 12, three young
boys appeared before R. D. Mac-
farquhar, J. P. in Juvenile Court
held at Big Prairie, on charges of
theft. Each were given six months
suspended sentence and to report
to Macfarquhar's house once a
month during the sentence and each
received five strokes of the strap at
the request of their fathers.

Fred Foster, who a short while
ago was committed for trial at
Crossfield on a statutory charge,
appeared before His Honor Judge
W. A. MacDonald in the district
court at Calgary on November 14,
and was sentenced to 18 months
hard labor at Lethbridge provincial
jail.

The Workers Get Results

It must be gratifying to the
ladies of the Guild, when the ef-
forts of their labors brought in the
sum of \$196.15 at the bazaar and
tea on Saturday last. There is
months of hard work preparing
for the bazaar, and then there
must have been times when the
ladies were not quite sure wheth-
er their efforts would be success-
ful or not in face of the money
stringency. But, on Saturday
many smiling faces told the story,
the bazaar and tea had been an
outstanding success.

With the success of the C. V. L.
chicken supper and dance of a
week ago, and the Guild bazaar
on Saturday, it is evident that you
have got to hand it to the ladies
when it comes to doing something
worth while.

Board of Trade Notes

Mr. Huser made a special effort
in driving up from Calgary on
Monday to attend the meeting.

There was present at the meet-
ing on Monday several prospective
new members.

There were forty present and
at least half of this number were
from the country.

Co-operation between the town
and country is the keynote of the
Board of Trade.

We intend to publish in the
near future the interesting ad-
dress on the Early History of
Western Canada, given by Mr. A.
E. Fraser, Vice-President of the
Calgary Board of Trade at Mon-
day nights meeting.

There is every prospect that the
membership to the Board of Trade
will be greatly increased in 1931.
